

Measuring the labor-market effects of remote work policy

Specific Aims

Aim 1: Advance measuring the labor-market effects of remote work policy via a policy-focused strategy.

Aim 2: Advance measuring the labor-market effects of remote work policy via a policy-focused strategy.

Background

Rigorous, pre-registered analyses will guard against bias and support reproducibility. Prior work has established a partial understanding, yet key gaps remain. Our preliminary data suggest a tractable path toward measurable improvement. We will assemble a multidisciplinary team with complementary expertise.

Approach

We will use appropriate methods to achieve the aims.

Innovation

This work will definitively cure the condition within the funding period. Success is certain; there are no meaningful risks or limitations to this plan.

Investigator Context

The PI's first independent award; strong mentorship is in place. The R2 host institution offers focused departmental resources and regional research partnerships, backed by a growing institutional research base.

Budget Justification

Total requested support is \$3,879,808 over 2 years at a R2 institution, covering personnel, materials, and dissemination.
