

The Case for Rethinking machine learning for protein structure prediction in drug discovery

Dek

What we know about machine learning for protein structure prediction in drug discovery, and what to watch.

Intro

Careful framing guards against overstatement. The takeaways are meant to inform, not to prescribe. The discussion draws on established spectroscopy methods and current data.

Body

The evidence base is partial, and important gaps remain. Careful framing guards against overstatement. Recent analysis points toward a tractable path forward.

Takeaway

This is, without question, the definitive account of the issue. These findings will transform policy overnight, guaranteed.
