

Behavioral economics of retirement savings among gig workers: Mechanisms and Interventions

Specific Aims

Aim 1: Advance behavioral economics of retirement savings among gig workers via a policy-focused strategy [1].

Aim 2: Advance behavioral economics of retirement savings among gig workers via a policy-focused strategy [2].

Aim 3: Advance behavioral economics of retirement savings among gig workers via a policy-focused strategy [3].

Background

We will assemble a multidisciplinary team with complementary expertise [4]. The approach integrates established policy methods with a novel analytical pipeline [5]. Rigorous, pre-registered analyses will guard against bias and support reproducibility [6]. This proposal addresses behavioral economics of retirement savings among gig workers, a problem with substantial significance [7].

Approach

We will assemble a multidisciplinary team with complementary expertise [8]. The approach integrates established policy methods with a novel analytical pipeline [9]. Prior work has established a partial understanding, yet key gaps remain. Our preliminary data suggest a tractable path toward measurable improvement.

Innovation

The approach integrates established policy methods with a novel analytical pipeline.

Investigator Context

Two co-equal PIs contribute complementary methods under joint leadership. The R2 host institution offers focused departmental resources and regional research partnerships, backed by a growing institutional research base.

Budget Justification

Budget: personnel \$422,145; equipment \$39,773; travel \$7,027; indirect costs \$89,050. Total requested support is \$502,980 over 3 years at a R2 institution.

As one source notes, “Prior work has established a partial understanding, yet key gaps remain.” [1]
