

Wearable sensors for continuous glucose monitoring in rural clinics: Findings and Recommendations

Executive Summary

The discussion draws on established throughput methods and current data. Careful framing guards against overstatement.

Background

The discussion draws on established throughput methods and current data. The takeaways are meant to inform, not to prescribe. Recent analysis points toward a tractable path forward.

Findings

Practitioners and policymakers alike have a role to play here. The discussion draws on established throughput methods and current data. Careful framing guards against overstatement.

Recommendations

Recent analysis points toward a tractable path forward. Practitioners and policymakers alike have a role to play here.
